Parts of a flower

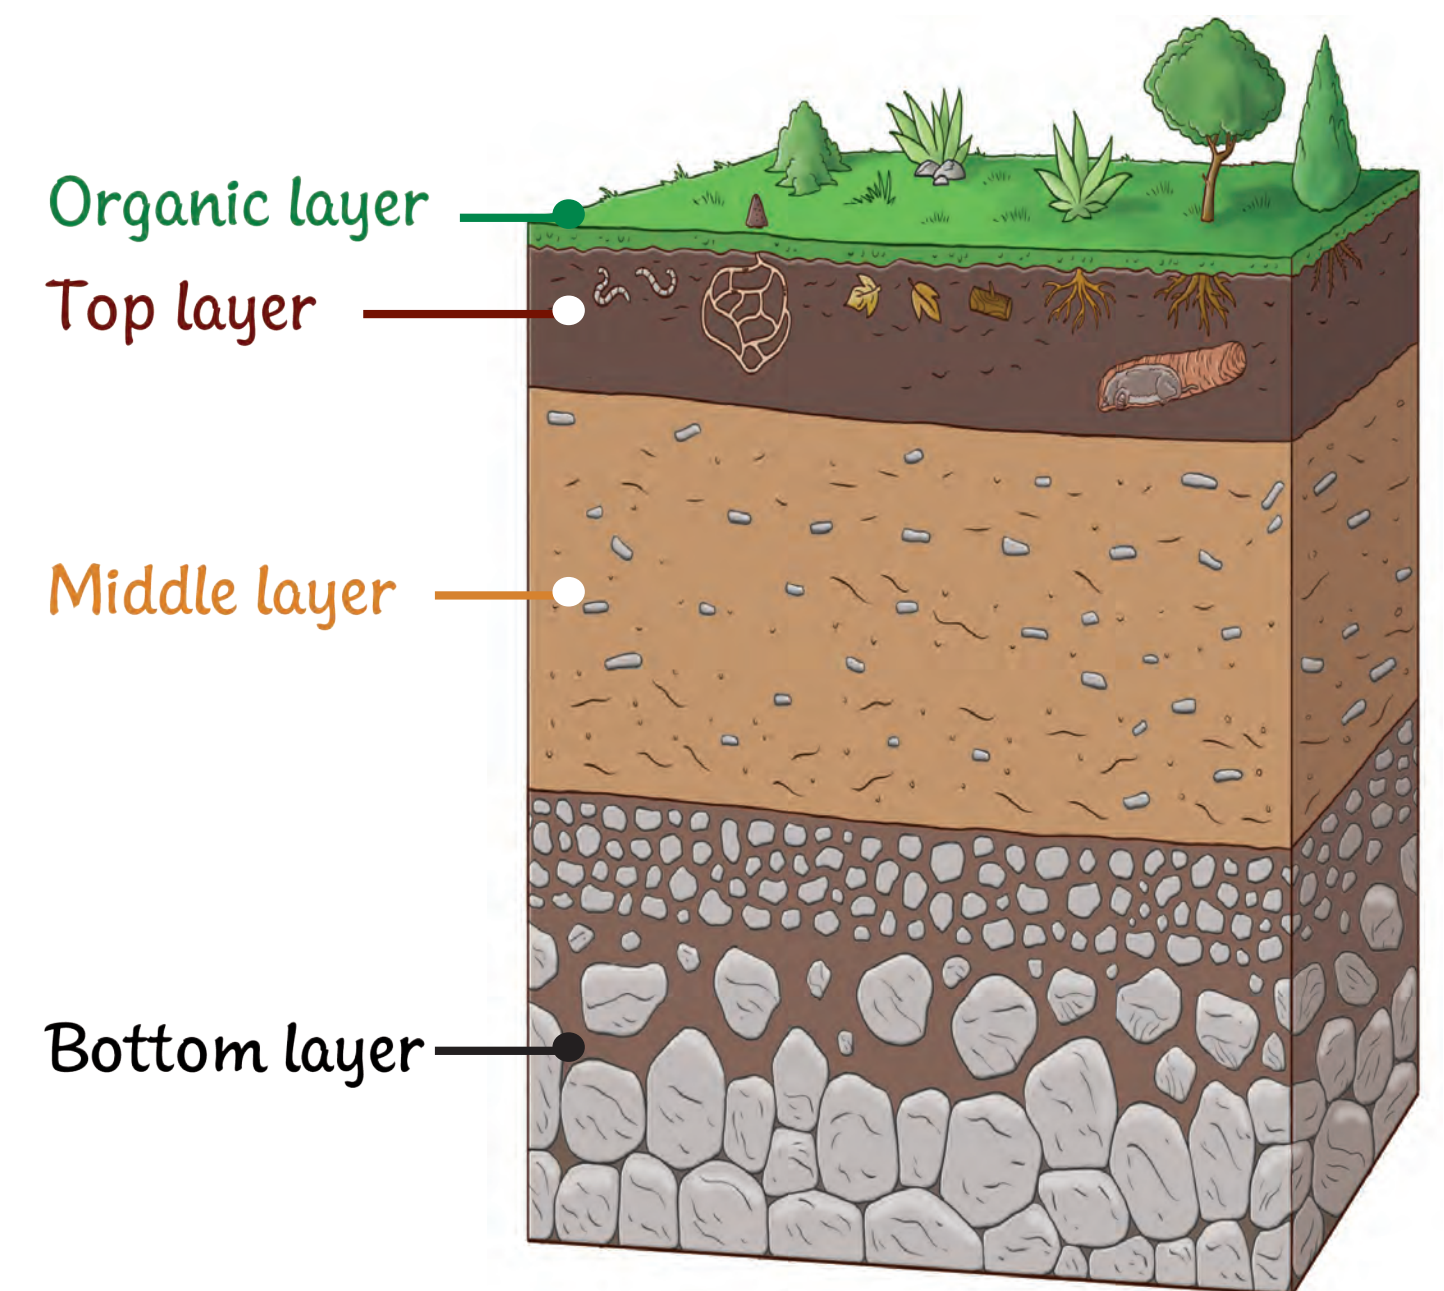

Parts of the Earth

Layers of soil

Technology

is the invention and creation of things that we use to help us in our lives and our jobs.

is evolving and adapting all the time.

Prehistoric people

painted on caves and rocks.

made and used:

simple tools

simple weapons

simple utensils

People discovered

Fire

People discovered that they could use fire to cook and extract metal from rocks.

People invented

Wheel

When the wheel was invented, transporting things was quicker and easier.

Pulley

With the technology of the pulley and the lever, people could move heavy rocks and use them for building.

Printing

Inventions like the printing press made it quicker and easier to communicate information.

Scientific

Research

Helps us to understand the world we live in.

Discoveries

Have protected and cured people from illness and disease.

Media

Are different forms of communication.

We communicate:

By speaking and listening.

By writing and reading.

With images.

Look at our beautiful planet. Earth Day
